

DESCRIPTION: The C-Bracket is made from high strength steel, with a plated cam. C-Brackets are very durable, and stand up very well to typical jobsite conditions, allowing the contractor many re-uses.

APPLICATION: To be used with 8-1/4" end 3M strength, button head snapties. Designed for conventional single waler, poured-in-place concrete forms, to hold the double vertical strongbacks in place for formwork alignment.
