

DESCRIPTION: Concrete Snaptie Plugs are made from hi-strength grout and come in a standard concrete gray color. They fit flush into the holes in concrete poured in place walls left by a standard 1" x 1" plastic cone.

APPLICATION: Concrete Plugs should be dipped in concrete bondor or epoxy for adequate bonding to hole left by 1" x 1" snaptie cone. They can be left exposed, or patched over. Using concrete plugs can cut down on sack and patch time, as well as preventing rust lines from streaking down the wall from exposed rusted snaptie ends.

PRODUCT CODE: CONPLG

WEIGHT: 2.4 LBS./C
