

DESCRIPTION: Nut washers are made from ductile iron. They are available in Coil and Acme thread, in 1/2", 3/4", and 1" diameters.

APPLICATION: Nut washers are used with She-Bolts and Taper Ties in concrete wall forming. They combine the features of a broad bearing washer, as well as a heavy duty nut. They are made with nail holes to secure them to the form lumber.

NUT WASHER LOAD CHART	
DIAMETER	TENSION LOAD
1/2"	4,500 lbs.
3/4"	9,000 lbs.
1" & 1-1/4"	18,000 lbs.

Safe Working Load provides a safety factor of approximately 2:1
