

DATA SHEET

Screed Pad Posts Die Cast Screed Pads

DESCRIPTION: Screed Pad Posts are made from 3/4" round steel and tapped with a 1/2" n.c. thread in one end.
Die Cast Screed Pads are made from a zinc alloy. They have a 1/2" n.c. thread stud in the center of a 3" diameter base. They are non-rusting.

APPLICATION: Screed Pads and Posts are used in concrete screeding applications. They can be used on plywood, concrete, or steel deck pours. They can be secured by either screws or construction adhesive. Their non-rusting quality makes this a great system for overhead deck pours.

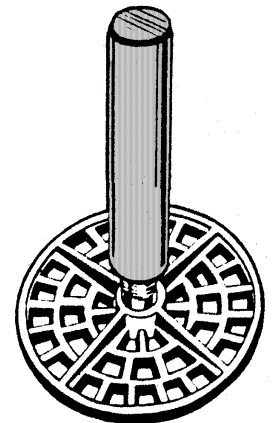

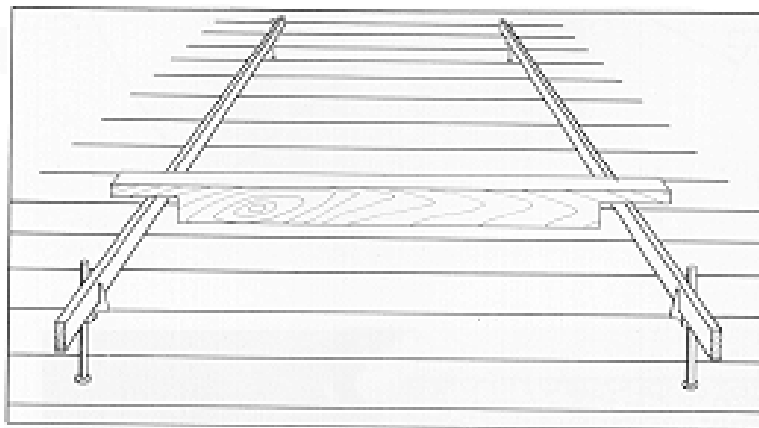

PRODUCT CODE: SCRPS

WEIGHT: .16 LBS. EA

PACKAGED: 500 PER BOX

SIZE:	PRODUCT CODE:	WEIGHT:
