

DESCRIPTION: Shims and Shim Packs are made from a high impact polystyrene. They have a yield strength of over 10,000 PSI. The individual shims come in 1/16", 1/8", and 1/4" thicknesses. Shim packs are assembled in packs consisting of one 1/16", two 1/8", and three 1/4" shims. The shims are made with slip resistant ribs to prevent sliding, and are color coded for easy thickness identification.

APPLICATION: These high density shims are used under Tilt-up panels, pre-cast beams, and other heavy construction applications, where a shim must be left in place. Because they won't rust, rot, or stain, they are ideal for permanent leveling.

10,000 PSI Compressive Strength

EACH SHIM PACK CONTAINS:

1ea 1/16"

2ea 1/8"

3ea 1/4"

INDIVIDUAL SHIMS ARE PACKAGED:

1/16" 800 box

1/8" 400 box

1/4" 200 box
