

DESCRIPTION: This stamped metal cleat is made for various wall and footing thicknesses, and will accommodate 3/4" and 1-1/8" lumber.

APPLICATION: Speed Clips are used in footing and grade beam forms, as well as poured-in-place concrete wall forming. Speed clips are used on the bottom and the top of concrete forms, and should be spaced at 24" centers. When using Speed Clips for walls over 18", snapties should also be used to avoid deflection in the form.

SIZES: Wall: 6", 8" 10" 12"
End: 3/4" or 1-1/8"

PACKAGED: 100 PER BOX, 5,000 PER PALLET

750 lbs. Safe Working Load
2:1 Safety Factor
