

PENCIL ROD WRENCH

TECHNICAL DATA SHEET

DESCRIPTION:

Pencil Rod Wrenches are used with Pencil Rod and Pencil Rod Clamps to draw the form into position. Available in 1/4" and 3/8".

APPLICATION:

Tightening Wrenches pull the Pencil Rod tight, the rod clamps are then secured, and the rod is then bent up. Although this method is not very strong, it is a quick and economical way to meet certain concrete forming needs.
