

# SCISSOR CLAMPS

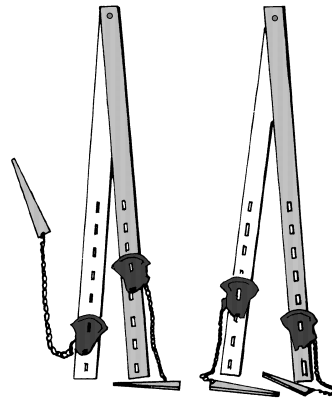

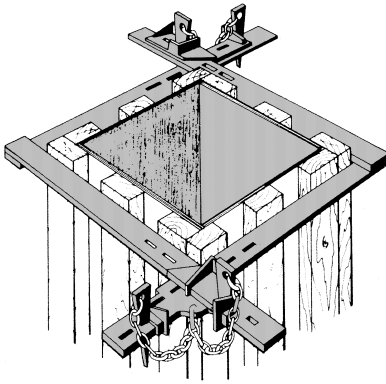

## TECHNICAL DATA SHEET

### DESCRIPTION:

Scissor Clamps, or Column Clamps, are used in conventional concrete column forming. They are made of a special high strength steel, and come with the pin and chain assembly. They are generally sold in sets, which consist of two Scissor Clamps. Scissor Clamps come in three sizes: 36", 48", 60".

### APPLICATION:

For columns of net concrete size from 6" to 46", clamps are adjustable to fractions of an inch. There are no separate parts to lose and a hammer is the only tool needed. Scissor Clamps are symmetrical and interchangeable, open either way, either side up, and they automatically square the column.

PRODUCT CODE	SIZE	WEIGHT
CLM036	36"	40 LBS. / SET
CLM048	48"	56 LBS. / SET
CLM060	60"	85 LBS. / SET

\*Clamps are sold and rented by the piece, but two (2) pieces are required to make a useable clamp set.

\*\*Concrete dimensions based on 3/4" (19mm) plywood with flat 2x4's (38mm x 89mm) at 6" (152mm) on center.
