

SCREED HOOKS

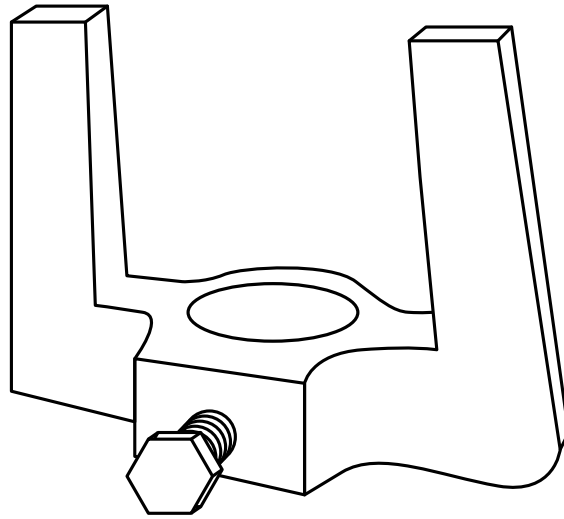

DOUBLE SCREED HOOK — TECHNICAL DATA SHEET

DESCRIPTION:

Made from steel, Double Screed Hooks are equipped with a hole to attach to stakes during the flatwork process. Available in two sizes: 2"x4" or 1/2"x2". Used in conjunction with 3/4" round stakes and various screed posts.

APPLICATION:

Double Screed Hooks are used to keep screed bar or lumber parallel during the flatwork process. Double Hooks are able to hold two bars or two pieces of lumber instead of one.
