

SCREED POST PADS

TECHNICAL DATA SHEET

DESCRIPTION:

Die Cast Screed Pads are made from zinc alloy. They have a 1/2" N.C. thread stud in the center of a 3" diameter base. They are non-rusting.

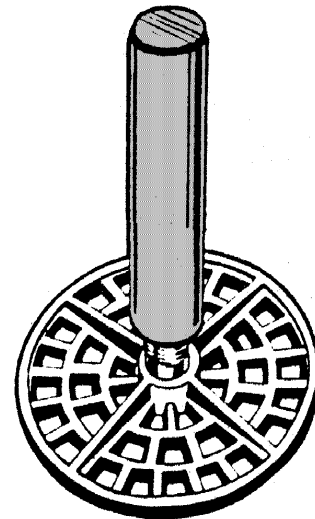

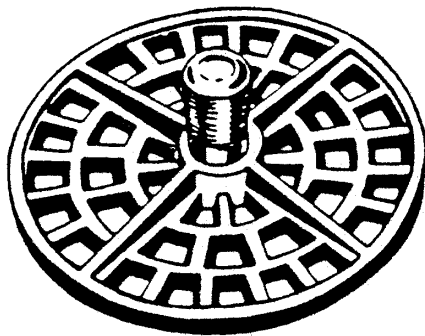

APPLICATION:

Screed Pads are used in concrete screeding applications. They can be used on plywood, concrete, or steel deck pours. They can be secured by either screws or constructive adhesive. Their non-rusting quality makes this a great system for overhead deck pours.

PRODUCT CODE: SCRPDS

WEIGHT: 0.16 LBS. EACH

PACKAGED: 500 PER BOX

SIZE	PRODUCT CODE	WEIGHT
8"	SCRPO8	1.0 LBS. EACH
10"	SCRPO10	1.25 LBS. EACH
12"	SCRPO12	1.5 LBS. EACH
16"	SCRPO16	2.0 LBS. EACH
18"	SCRPO18	2.25 LBS. EACH
24"	SCRPO24	3.0 LBS. EACH
30"	SCRPO30	3.75 LBS. EACH
