

TAPPED LAG BOLTS

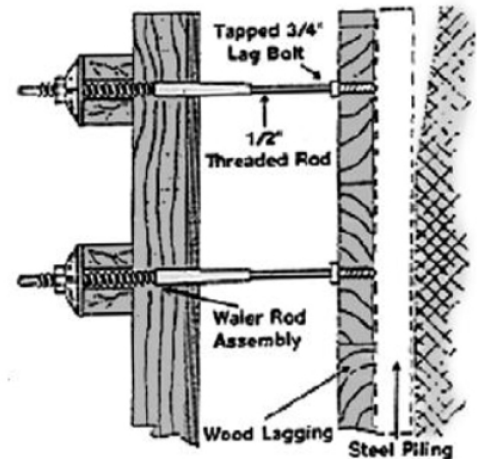

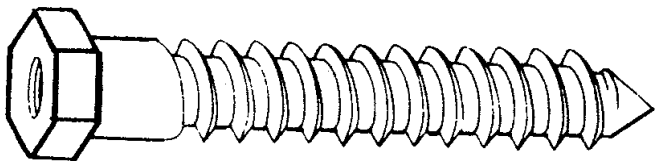

TECHNICAL DATA SHEET

DESCRIPTION:

Tapped Lag Bolts provide a temporary solution for combining formwork to wood fixtures.

APPLICATION:

A common application for Tapped Lag Bolts is a one-sided blind forming against soldier piles with wood lagging. Tapped Lag Bolts simplify foundation wall forming, speed concrete pours, and reduces external bracing.

TIMBER SIZE	S.W.L. = 2:1	PILOT HOLE SIZE
2" X 10"	1,575 LBS.	9/16"
3-3/4" OR 4" X 12" THREAD	3,500 LBS.	9/16"
QUALITY OF LUMBER WILL AFFECT STRENGTH		

PRODUCT CODE	SIZE	WEIGHT	PACKAGED
TPLGNC	3/4" X 5" N.C.	0.67 / EACH	EACH
TPLGCO	3/4" X 5" COIL	0.67 / EACH	EACH
THIS PRODUCT REQUIRES PROPER ENGINEERING
