

RESHORE SPRINGS

TECHNICAL DATA SHEET

DESCRIPTION:

Reshore Springs help keep shores held tightly together against any slab.

APPLICATION:

Reshore Springs can be held in place for any period of time. Using Reshore Springs prevents the misuse of lumber and labor when connecting shims to the top and bottom of shores. To set the spring securely, use the hole in the center to nail the spring to the shore. Each spring is rated at 200 lbs. for compression and will return to its original form after each use.

PRODUCT DIMENSIONS:

SIZE: 3.5in x 5in. UNCOMPRESSED
