

QUIK LOCK BRACKET

TECHNICAL DATA SHEET

DESCRIPTION:

Quik Lock Bracket

APPLICATION:

To be used with 3M strength loop ties. Designed for conventional single waler, poured-in-place concrete forms. They will accept standard 2x4 lumber. Quik Lock Brackets allow the user to build a concrete wall form with no nailing of the plywood to the 2x4 walers, saving time and money. In addition, stripping the form is made much easier because the brackets are one piece and are simple to remove.

PRODUCT CODE	WEIGHT
QUIKBKT	1.4 LBS. EACH
2,250 LBS. SAFE WORKING LOAD IS APPROX. BASED ON A 2:1 SAFETY FACTOR
