

SPANDREL HOOK TIE

TECHNICAL DATA SHEET

DESCRIPTION:

Spandrel Hook Snapties are fabricated the same as a Spandrel Point Snaptie but are equipped with a hook instead of a bend. The hook is used to wrap around structural beam forms.

APPLICATION:

Spandrel Hook Snapties are used to attach light outside spandrel beam forms to structural forms. Once the hook is in place, the end of the hook is tack welded to the structural beam.

SPANDREL HOOK SNAPTIE
