

SCREW JACKS

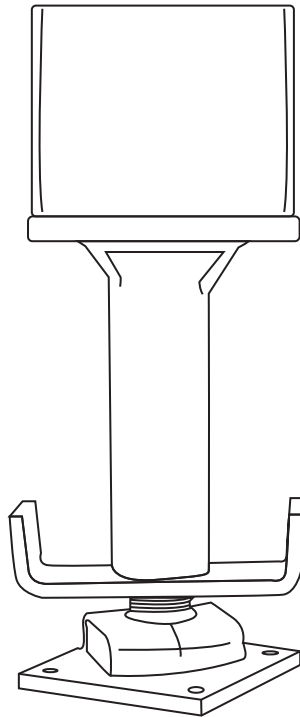

TECHNICAL DATA SHEET

DESCRIPTION:

Screw Jacks are used to allow for adjustable support for any length of lumber. Made from high quality steel, Screw Jacks could be used for permanent or temporary support in concrete construction.

APPLICATION:

Use with Dressed Lumber, cut square to any length. Turn "U" handle to adjust height of Screw Jack. Lifts up to 1800lbs. by hand or up to 4000lbs. with a 2"x4"x6' piece of lumber place between screw and handle for additional leverage.

TOTAL SHORE HEIGHT	APPROX. MAX. SAFE WORKING LOAD (LBS.)
6'	30,000
8'	30,000
10'	27,000
12'	20,000
14'	15,000
16'	11,500
18'	8,000
20'	6,000

SAFE WORKING LOAD IS APPROX. BASED ON A 2.5:1 SAFETY FACTOR.
