

SNAPTIE EXTENDERS

TECHNICAL DATA SHEET

DESCRIPTION:

Tie Extenders allow for vertical strongbacks to be added anywhere on the wall form.

APPLICATION:

Tie Extenders convert a standard short-end Snaptie to a long-end Snaptie. This allows for the addition of periodic strongbacks to single waler forms, by using double 2x4's and a Snaptie Wedge. Use nails through the added hole to secure the Tie Extender to the Snaptie.

PRODUCT CODE	WEIGHT	SAFE WORKING LOAD	PACKAGED
