

# SPEC-CAP

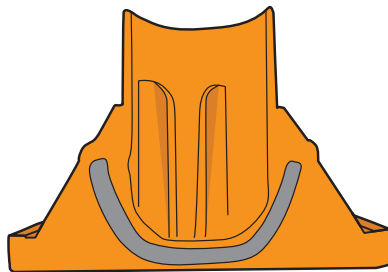

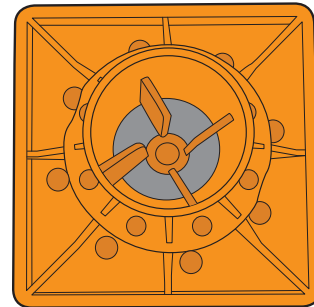

## TECHNICAL DATA SHEET

### **DESCRIPTION:**

The Spec-Cap is designed to only be used on rebar sizes #3-#11. Please do not use on other sizes of rebar. The Spec-Cap is internally reinforced with a concave steel plate. Safety Orange for high visibility. The Spec-Cap is designed for use at or above grade. It is to not exceed 7-1/2 vertical feet of fall exposure to the top of the Spec-Cap. Meets FED. OSHA spec #1926.701(B) and has CAL OSHA approval #C-1738-AG

### **APPLICATION:**

Place the Spec-Cap over the head of the exposed rebar. To ensure the cap is secure, attach it to the rebar by pressing it down until the internal metal plate is fully engaged with the rebar. The find in the collar must secure the Spec-Cap to the rebar. On larger sizes of rebar, you will need to turn the Spec-Cap while pressing it doen, in order to secure it.
