

RAPID LOCK COLUMN CLAMP

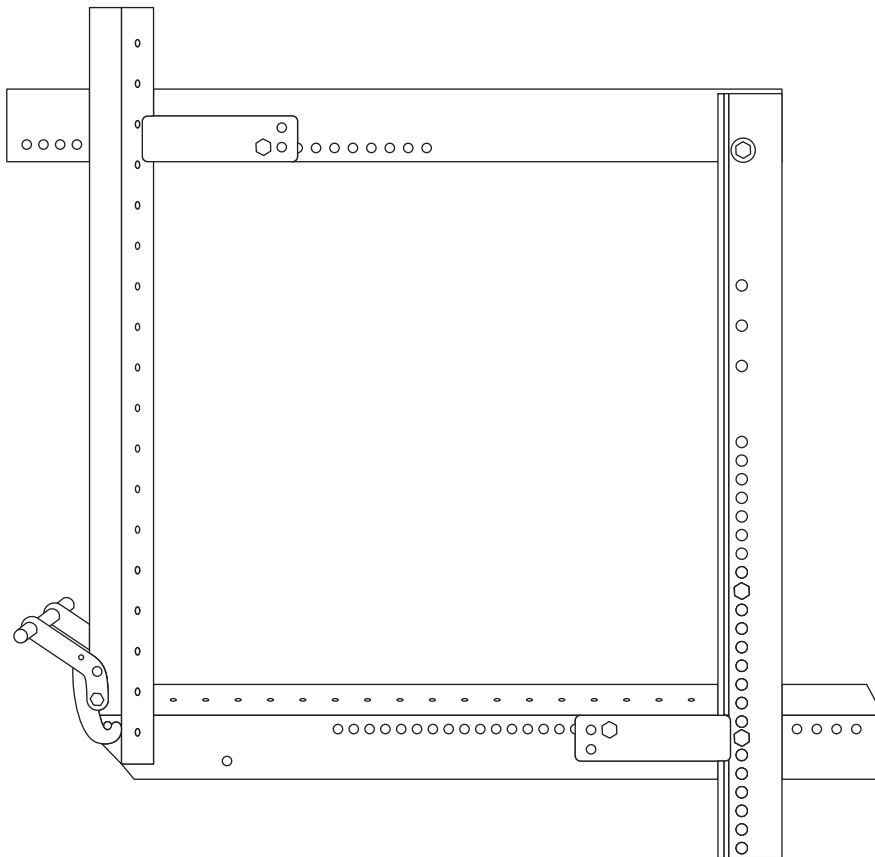

TECHNICAL DATA SHEET

DESCRIPTION:

Rapid Lock Column Clamps are used in conventional concrete column forming. They are made of high-strength steel, and unlike the the pin and chain assembly, the Rapid Lock Clamps are equipped with a locking handle to easily connect and adjust for your column width.

APPLICATION:

For columns of net concrete size 8" to 48", Clamps are adjustable to fractions of an inch. Rapid Lock Column Clamps are symmetrical and provide fast assembly on jobsites, due to the locking hook handle.

PRODUCT CODE	SIZE	COLUMN SIZE
RLCC824	24"	8" TO 24"
RLCC1236	36"	12" TO 36"
RLCC2448	48"	24" TO 48"
