

ADJ. JOIST HANGER

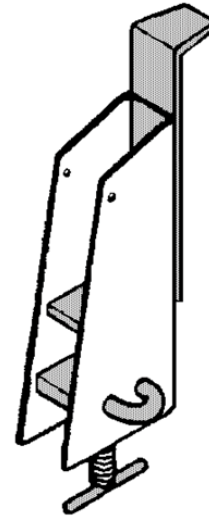

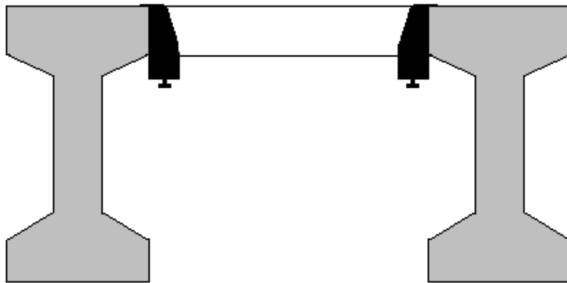

TECHNICAL DATA SHEET

DESCRIPTION:

Our Adjustable Joist Hanger is an easy-to-use, versatile, and cost-effective way to build suspended concrete slab decks. Made from high-quality steel, these hangers are able to be reused for different jobsites. The adjustable screw jack allows for easy adjustments on the fly.

APPLICATION:

Adjustable Joist Hangers are a cost effective method for forming bridge decks, box culverts, and other elevated concrete slabs. These hangers are for interior spans only; they are not to be used on exterior cantilevered decks slabs. Adjustable Joist Hangers reduce shoring materials, tears down faster, and increases efficiency.
